## **Information in this document is subject to change without notice.**

Sony and VAIO are trademarks of Sony. Intel logo and Intel Inside logo are registered trademarks of Intel Corporation. Pentium MMX is a trademark of Intel Corporation. Microsoft, MS-DOS, Windows, the Windows 95 and Windows 98 logo are trademarks of Microsoft Corporation.

All other trademarks are trademarks or registered trademarks of their respective owners. Other trademarks and trade names may be used in this document to refer to the entities claiming the marks and names or their products. Sony Corporation disclaims any proprietary interest in trademarks and trade names other than its own.

**Caution Markings for Lithium/Ion Battery** - The following or similar texts shall be provided on battery pack of equipment or in both the operating and the service instructions.

**CAUTION:** Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Discard used batteries according to the manufacturer's instructions.

**CAUTION:** The battery pack used in this device may present a fire or chemical burn hazard if mistreated. Do not disassemble, heat above 100°C (212°F) or incinerate.

Dispose of used battery promptly.

Keep away from children.

**CAUTION:** Changing the back up battery.

- Overcharging, short circuiting, reverse charging, multilatation or incineration of the cells must be avoided to prevent one or more of the following occurrences; release of toxic materials, release of hydrogen and/or oxygen gas, rise in surface temperature.
- If a cell has leaked or vented, it should be replaced immediately while avoiding to touch it without any protection.

## **Service and Inspection Precautions**

### **1. Obey precautionary markings and instructions**

Labels and stamps on the cabinet, chassis, and components identify areas requiring special precautions. Be sure to observe these precautions, as well as all precautions listed in the operating manual and other associated documents.

### **2. Use designated parts only**

The set's components possess important safety characteristics, such as noncombustibility and the ability to tolerate large voltages. Be sure that replacement parts possess the same safety characteristics as the originals. Also remember that the  $\Delta$  mark, which appears in circuit diagrams and parts lists, denotes components that have particularly important safety functions; be extra sure to use only the designated components.

### **3. Always follow the original design when mounting parts and routing wires**

The original layout includes various safety features, such as inclusion of insulating materials (tubes and tape) and the mounting of parts above the printer board. In addition, internal wiring has been routed and clamped so as to keep it away from hot or high-voltage parts. When mounting parts or routing wires, therefore, be sure to duplicate the original layout.

### **4. Inspect after completing service**

After servicing, inspect to make sure that all screws, components, and wiring have been returned to their original condition. Also check the area around the repair location to ensure that repair work has caused no damage, and confirm safety.

### **5. When replacing chip components...**

Never reuse components. Also remember that the negative side of tantalum capacitors is easily damaged by heat.

### **6. When handling flexible print boards...**

- The temperature of the soldering-iron tip should be about 270C.
- Do not apply the tip more than three times to the same pattern.
- Handle patterns with care; never apply force.

Caution: Remember that hard disk drives are easily damaged by vibration. Always handle with care.

### **ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!**

**LES COMPOSANTS IDENTIFIÉS PAR UNE MARQUE  $\Delta$  SUR LES  
DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT  
CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE  
REEMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY  
DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU  
DANS LES SUPPÉMENTS PUBLIÉS PAR SONY.**

## 1-4. Replacing the CPU

### NOTE:

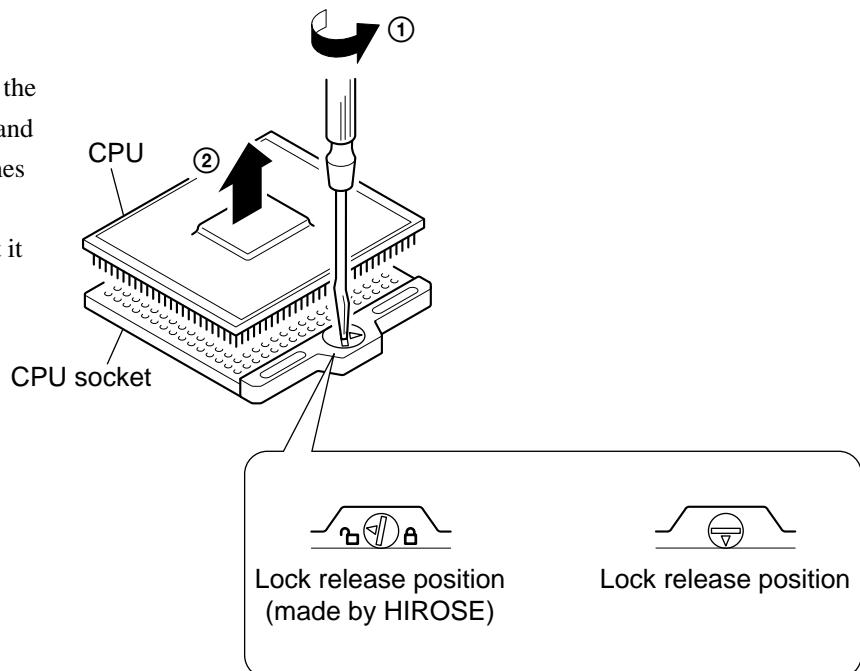

This computer uses either one of the two types of CPU socket.

The CPU locking position and the lock-release position are different depending on the types of the CPU socket.

### 1. Socket type 1, 2

#### 1. Removing the CPU

- ① Insert a flat-blade screwdriver into the notch as shown in the illustration and rotate it so that the protrusion comes to the lock release position.
- ② Pull the CPU gently upward to lift it out of the CPU socket.

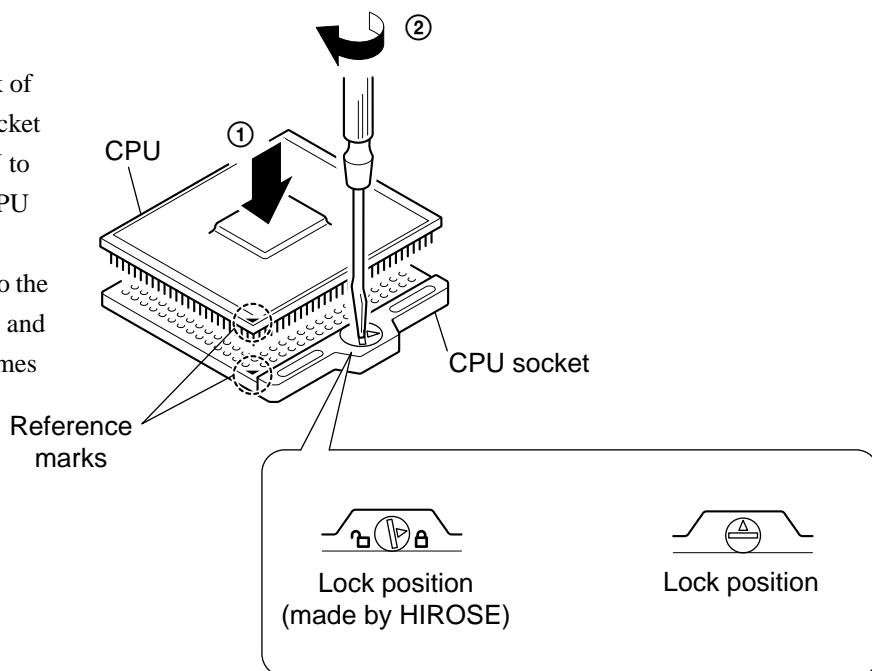

Lock release position  
(made by HIROSE)

Lock release position

#### 2. Installing the CPU

- ① Align the triangle reference mark of the CPU with that of the CPU socket and insert all the pins of the CPU to the corresponding holes of the CPU socket.
- ② Insert a flat-blade screwdriver into the notch as shown in the illustration and rotate it so that the protrusion comes to the lock position.

Lock position  
(made by HIROSE)

Lock position

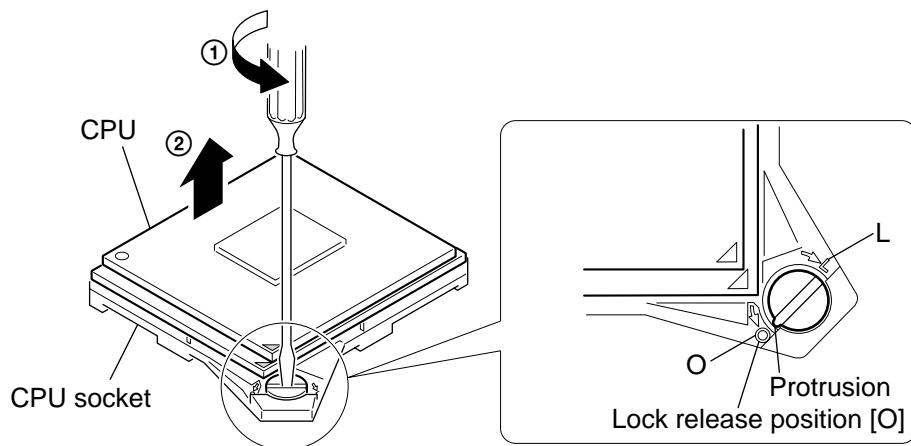

### NOTE:

Rotate a flat-blade screwdriver to the lock position securely. If not, the operation of the CPU may become unstable.

Confidential

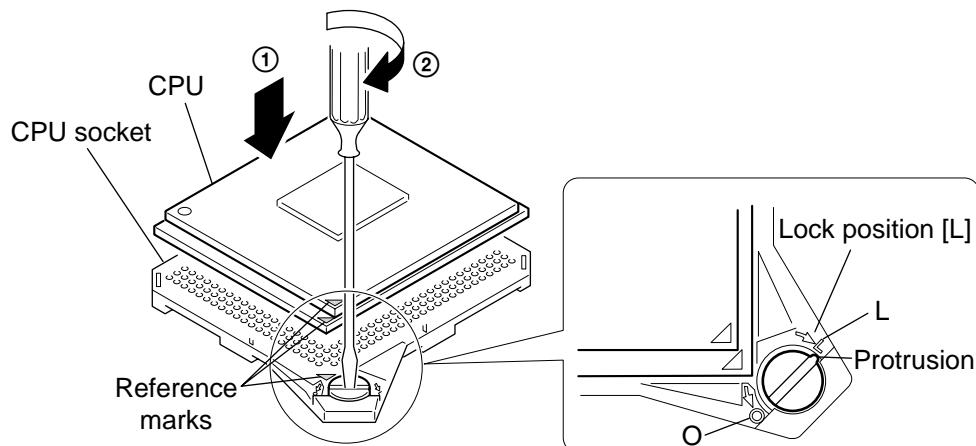

## 2. Socket type 3

### 1. Removing the CPU

- ① Insert a flat-blade screwdriver into the notch as shown in the illustration and rotate it so that the protrusion comes to the “O” (lock release) position.
- ② Pull the CPU gently upward to lift it out of the CPU socket.

### 2. Installing the CPU

- ① Align the triangle reference mark of the CPU with that of the CPU socket and insert all the pins of the CPU to the corresponding holes of the CPU socket.
- ② Insert a flat-blade screwdriver into the notch as shown in the illustration and rotate it so that the protrusion comes to the “L” (lock) position.

#### NOTE:

- Considerable force is required to rotate a flat-blade screwdriver.
- Rotate a flat-blade screwdriver to the “L” (lock) position securely. If not, the operation of the CPU may become unstable.

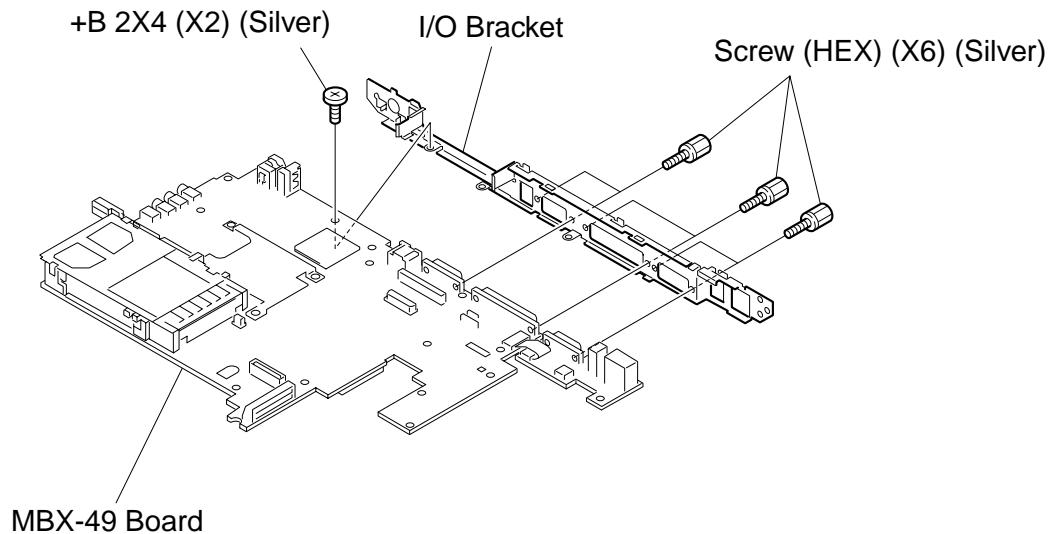

**Confidential**

## **1-5. Replacing Various Connectors on the MBX-49 Board**

Replace the connectors of “5-5. Connector Section” as follows.

### **1. Removing the I/O Bracket**

When removing the connectors of reference numbers 164, 165 and 167 (refer to page 5-13), remove the I/O bracket first.

### **2. Removing the Various Connectors**

The connectors of reference numbers 164, 165 and 167 (Refer to page 5-13, 5-14) are connected by soldering, remove the soldering first then remove the connectors.

**Confidential**

## 1-6. DIP Switch Setting of the MBX-49 Board

Set the DIP switch on the MBX-49 board (main board) to match with the LCD that is used in this computer, because several types of LCD are used as shown in the following table and the DIP switch setting differs depending on the LCD type.

MODEL	Name of LCD	Part No.	DIP switch setting

### FRAME HARNESS DIAGRAM

## CHAPTER 5.

### **EXPLODED VIEWS AND PARTS LIST**

**NOTE:**

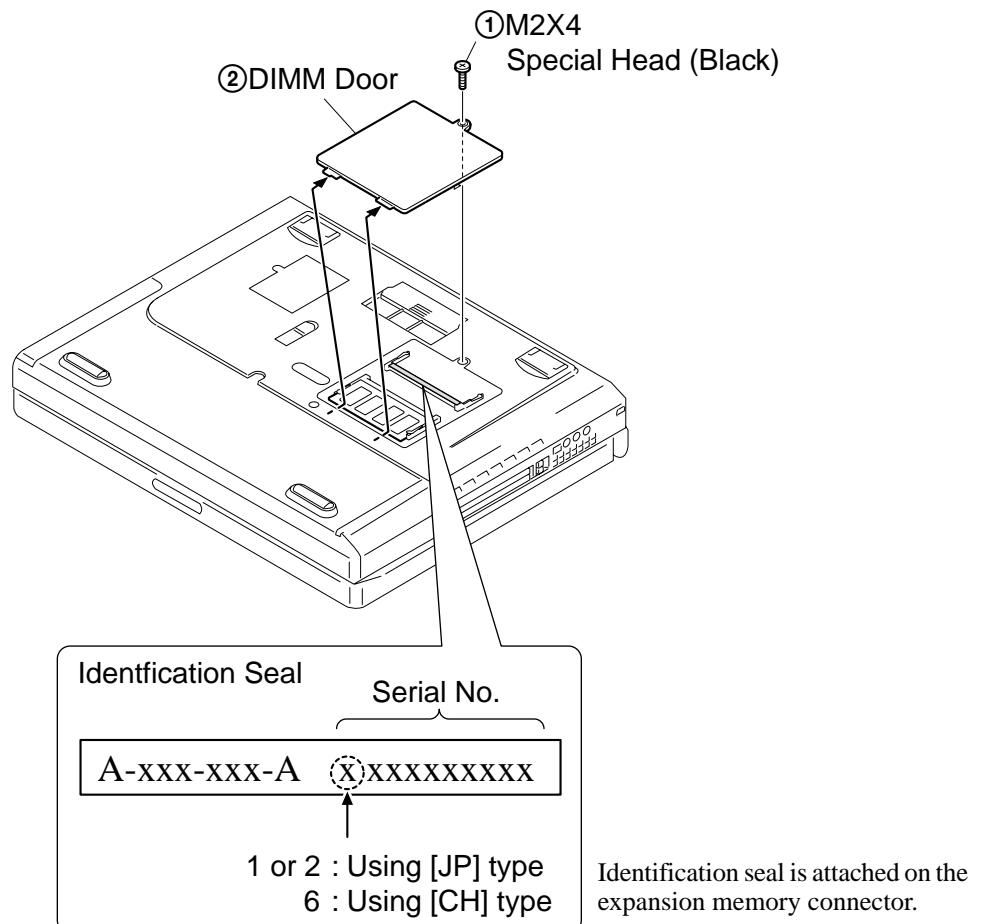

- The mechanical parts with no reference number in the exploded views are not supplied.
- Items marked “ \* ” are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- When two or more parts are shown in parallel, use the part described first as the main part.

The components identified by mark $\triangle$ or dotted line with mark $\triangle$ are critical for safety. Replace only with part number specified. <b>Les composants identifiés par une marque <math>\triangle</math> sont critiques pour la sécurité.</b> <b>Ne les remplacer que par une pièce portant le numéro spécifié.</b>
--

#### **How to use properly the repair parts.**

There are some parts that use the 2 types ; the [CH] parts or alternately the [JP] parts, in this series.  
 Use the [CH] repair parts for the [CH] type product, vice versa.

[ How to identify the parts ]

[ Repair part description example ]

The components identified by mark  $\triangle$  or dotted line with mark  $\triangle$  are critical for safety.  
Replace only with part number specified.

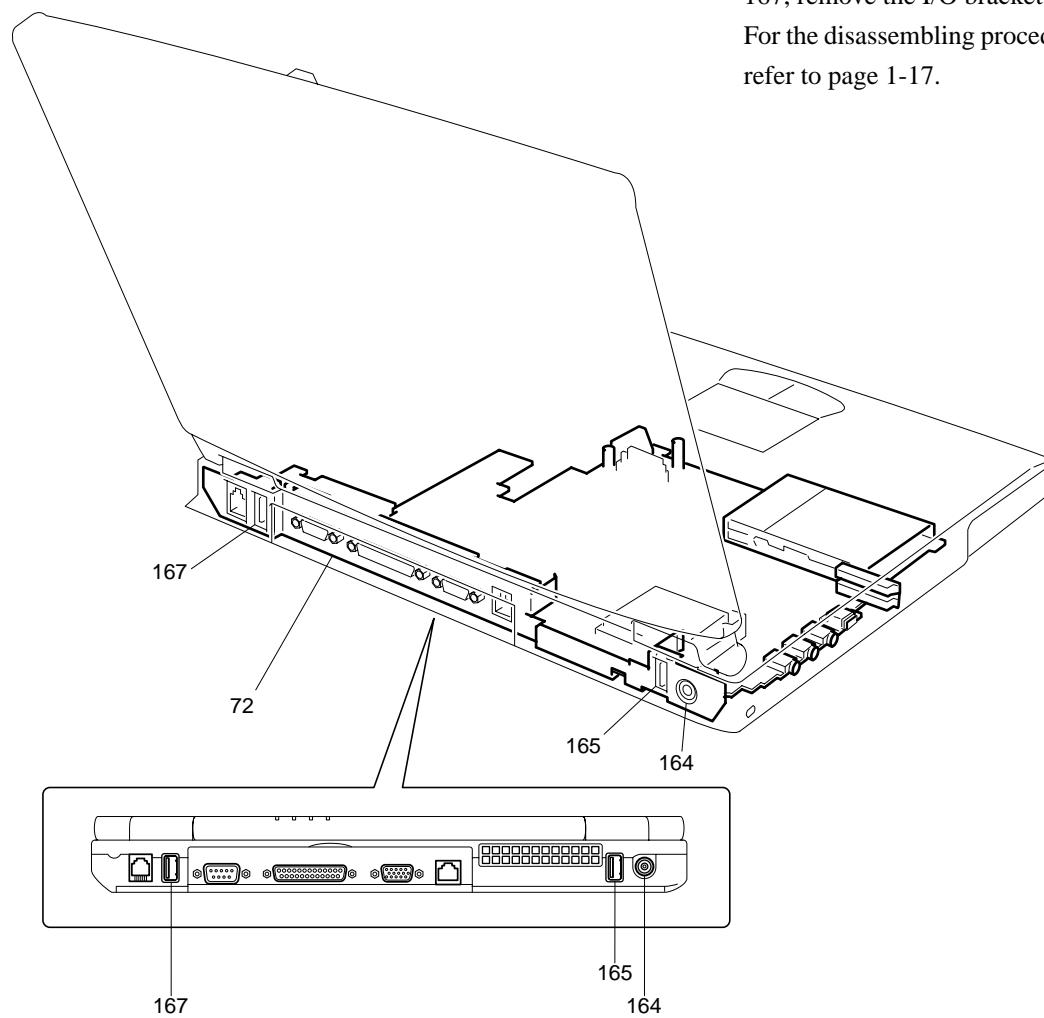

Les composants identifiés par une marque  sont critiques pour la sécurité.  
Ne les remplacer que par une pièce portant le numéro spécifié.

## 5-5. Connector Section

Ref.No.	Fig.	Part No.	Description
72		4-651-709-41 (CH)...BRACKET IO 4-651-709-01 (JP)...BRACKET IO	I/O BRACKET
164		1-779-745-21 JACK, DC	DC IN connector
165		1-815-422-11 CONNECTOR (VERTICAL)	USB connector
167		1-815-221-21 CONNECTOR, USB (VERTICAL)	USB connector

\*Before replacing the connector of reference number 164, 165 and 167, remove the I/O bracket.  
For the disassembling procedure, refer to page 1-17.
